Client	Venkata Maddala, (Airdrop Insurance)

Description :

Airdrop Insurance creates a social safety net for the most impoverished individuals in the Gurue District of Mozambique. The program utilizes a voucher system that allows businesses and residents to offer personal and crop insurance through a mobile platform. The vouchers can be exchanged for the local digital currency as well as other goods. The program also leverages collective risk for greater negotiating power in reinsurance

Profile of Users :

Normal Users: Users who apply for insurance using digital tokens.

Eg: Farmers, Jobholders, etc.

Community Manager : Verifies Official Documents and Audio Recordings to Grant User the access to the Airdrop Application

Admin: Adminstrates the Airdrop Application

Feature highlights :

- Bundled Reinsurance vaults to sustain unprecedented demand in Insurance Claims.
- Automatically issues claims based on weather conditions (if drastic change), job layoff patterns.
- User verification using coinbase account

Milestones and Timeline :

Milestone	Deliverable?
Evaluate the source code and existing privacy issues	Yes
Deploying App in Google Play Store	Yes
Creating Reinsurance Vaults for Users to keep Digital Currency	Yes
Testing	Yes
Redeploy the app on Google play store	Yes

Usage Model and Diagrams :
